Q #	Question	Answer
6	801000 maintenance of traffic and 801500 maintenance of traffic, all-inclusive are both listed as pay items. Since signs and drums are also listed as pay items, is the 801500 maintenance of traffic, all-inclusive an error?	Item 801500 Maintenance of Traffic all Inclusive pertains to work associated with location #2. Item 801000 Maintenance of Traffic and the individual MOT items pertains to location#1.
5	Should there be an item for pinned barrier in concrete for bridge decks?	The guardrail as of right now will not have to be pinned on the bridge decks, if this changes it will have to be addressed after the bid of the contract.
4	The majority of On/Off Ramps on Location 2 will require closures. Can detour plans be provided?	The topic of ramp closures can be brought up at the preconstruction meeting and if deemed necessary the detour plan process will be discussed at that time.
3	There is no MOT Guidance for Location 2. The breakout sheet states "to be submitted at Preconstruction Meeting". Does this mean it doesn't get submitted within the typical 7 days of bid?	The contractor's maintenance of traffic plan can be submitted to group 1 construction at the preconstruction meeting or sooner if desired, which at that time it will be reviewed and approved if acceptable.

2	Regarding the 14,510' PCC Curb I-IV shown to be placed underneath the new guardrail - this doesn't seem feasible under the current MOT provisions. Without a 24 hr. closure, we would have to remove/replace guardrail same shift, then hand form all of the curb due to limited space to perform the work. This will cause signification delays for the guardrail replacement, and we feel there is not enough contract time. Please advise.	Addressed in Addendum No. 4.
