Pavement & Rehabilitation, Kent II, (Micro Surfacing Replacement) 2018
Friday, September 28, 2018

Q #	Question	Answer
Thursday, September 27, 2018		
7	Shouldn't Special Provision 401699 be included with the RFP?	401699 spec will be added via addendum.
6	The material estimates in the plan document do not match the locations. For example, page 18 of 31 shows location #4 with material estimate for location #6, page 21 shows location #5 with material estimate for location #7, and page 26 shows location #7 with material estimate for location #4. Please revise the plans to show the correct material listings with corresponding locations.	This will be addressed via addendum.
Thursday, September 13, 2018		
5	Can clarification be provided to what the paving section will be for the Guardrail Maintenance Strip which is described under Location 7, Note 15B? What is the depth of the stone placement which is paid under 301002? Is 2'-4" width from face of W-beam correct?	This will be addressed via addendum.
4	Are striping/signage plans available prior to the bid?	This will be addressed via addendum.
Tuesday, September 11, 2018		
3	Is the material for Item 401582 supposed to be a stone matrix asphalt rubber mix?	This will be addressed via addendum.
2	Item 401021 appears to be a patching item as it correlates to the 402000 item. Is 401021 a patching item? Would that be item 401031?	Item 401021 shall be bid and paid as type B.C.B.C. bit. asphalt patching.
