QUESTIONS AND ANSWERS

T200800714.01

HSIP NCC SR 896 AND OLD CHESTNUT HILL ROAD INTERSECTION IMPROVEMENTS, NEW CASTLE COUNTY

Tuesday, March 18, 2014

Q #	Question	Answer
4	Please advise the size of the anchor bolts for the Pole Base, Special if these are to be furnished by the contractor, or advise pole manufacturer so we can size.	No response.

Friday, March 14, 2014

3	The Utility Statement on this project is in reality some 30-weeks (210-CD's) not accounting for any actual contract work req'd on the project) – the bar chart schedule at the back of the utility statement does NOT account for a 16-23 Wk lead-time. Please explain how this time-delta will be accounted for such that the Contractor does not incur LD's on this project.	No response.

2	Plan sheet #9 shows no work being performed. Is this correct?	Correct, sheet 9 shows no work being performed and remains in the plan set as work is identified on the related signage and striping sheet (sheet 30). Also note several MOT operations will also require the use of the area shown on sheet 9.
