VALLEY ROAD PEDESTRIAN IMPROVEMENTS/NEW CASTLE COUNTY

Tuesday, February 11, 2014

Q #	Question	Answer
5	Is there an earthwork summary for this project or are cross-sections available?	Cross sections will be available upon award of the contract.
4	What is the typical paving section of valley road?	The pavement sections are shown on the typical section. The typical sections lay out each section to be used between specific stations.
3	Bid item 708050 calls for 16 each 34" x 18" inlets as shown on the pricing proposal. On the drainage schedule on plan sheet 11 inlet d-4 is indicated as a 48" x 48" inlet. There are no 48" x 48" inlets shown on pricing proposal. Please clarify/	If this item is needed a field modification will be processed.
2	What is the limits of clearing on this project the CZ or the LOC?	The clearing limits are within the LOC.

1	Should there be items for CPM and Field Office on this contract?	This project does not need a field trailer or a CPM schedule. For these types of projects we have always left it up to the contractor to secure his own staging area, generally off site unless he wants to coordinate with a stakeholder on his own.
