Q #	Question	Answer
1	Can you let me know what item 720007 & 720025 are (galv st brackets)? I can't find them in the DELDOT barrier legend.	These are standard construction items that are referenced in our standard specifications as well as our standard construction details. This information is provided to them on-line at the deldot.net website. In our standard specifications, it is found under section 720, and in the construction details, it is found in section I – Barrier, under the respective items (of question).
