T201407801.01
BRIDGE PAINTING, NEW CASTLE COUNTY, 2015
Friday, August 14, 2015

Q #	Question	Answer
3	In reference to Bridge #: 1-147 - Faulkland Road over Red Clay Creek, Can the shoulder be closed with Jersey Wall?	We would consider allowing the closing of a shoulder with a concrete barrier. This will require the successful contractor to submit a detailed plan for approval after Award. The plan shall include typical sections, offsets, flare rates, length of need, attenuators, and any other information needed by the Department's Traffic section. The barrier will not be allowed to be attached (i.e., bolted down) to the bridge deck. Weight of the barrier and equipment and materials shall be submitted to the Department so that DelDOT can determine if the load carrying capacity is affected. The benefit in time savings will need to be part of the submittal. Final approval rests with the Department. Any cost for the barrier, plans, submittals, traffic control devices, and items necessary for the shoulder closure shall be included in bid price for Item # 763643 – Maintenance of Traffic.
2	Can you tell us what the hours will be for NIGHT Shift for Lane Closures on Bridge#'s: 1-900N, 1-900S & 1-558?	Lane and/or shoulder closures are allowed during the hours of 8:00 pm to 6:00 am. Cost for any additional requirements for MOT during these hours is to be included in Item # 763643 – Maintenance of Traffic.

1	My question is regarding the prevailing wages for highway construction. The rate in contract documents for painters is \$48.84 effective March 13, 2015. Will the prevailing wages for highway construction for painters be changed to \$63.14 per the prevailing wages for highway construction amended July 15, 2015?	Yes, Addendum 1 will address the amended state Prevailing wage rates.
