Wednesday, June 17, 2015

Q #	Question	Answer
3	At Locations 1 thru 4 what is item 302005 used for?	Item to be used for unimproved driveways and entrances if required.

Thursday, June 11, 2015

2	RR statement for this contract in the standard specs indicates that no RR within the contract limits so why do you have a RR protective item?	There is currently no agreement with Norfolk Southern that will allow us to mill and pave up to the existing crossing hence the statement was written accordingly. The railroad item was left in the contract and if an agreement is obtained the item will be paid.
1	Appears that you have listed the RR protective required in the wrong location. You have listed in location 1 and should be listed in location 2. Please clarify.	The railroad item should be found on location 2 not location 1. No change required, please bid item and it will be utilized on location 2.
