QUESTIONS AND ANSWERS
T201507602.02

BR 3-154 on US9 Savannah Road and BR 3-153 on SR1A Rehoboth Avenue over Lewes-Rehoboth Canal , New Castle County
Friday, October 26, 2018

Q #	Question	Answer
3	Special provisions for Thermoplastic Roofing and Flashing & Sheet metal were left out of the new Proposal Docs. Building Renovation SP still references roofing and sheet metal per the SP's (pg 188 & 192).	These Special Provisions are included in Addendum No. 1
2	Regarding the response to Question 17 in the prior letting of July 30 2018, the response stated that the contractor should assume various materials disturbed during control house remodeling might contain ACM's. If the owner does not have test reports for ACM's at the project sites that can quantify the abatement required, then appropriate bid items and/or allowances should be provided for testing and abatement of ACM's.	As indicated in response to Question 46 in the prior letting, there is no evidence that there is ACM at the bridges. However, if the contractor encounters ACM, they are to stop work in that area and notify DelDOT. DelDOT or their representative will assess the site and remediate it as necessary.

Thursday, October 18, 2018

1	Are any site visits scheduled, or can they be arranged for both bridges?	BR 3-153, the Rehoboth Drawbridge will be open for inspection on Oct 23, 2018 from 9am until 10:30am. BR 3-154, the Lewes Drawbridge will be open for inspection on Oct 23, 2018 from 11am until 12:30pm. There will be no questions entertained during the inspections. Any questions must be emailed to dot-ask@state.de.us
