CURB RAMP ADA IMPROVEMENTS, CITY OF WILMINGTON

Friday, September 27, 2019

Q #	Question	Answer
2	Can we separate out the construction work for sidewalks, paving, moving utilities and field construction work unrelated to the ramps? We are certified experts in ADA Design of the ramps and work with many construction companies. We would like to bid on the area of our expertise.	This is a construction bid package and, as such, all design work and utility coordination is complete. Work limits have been determined, construction items and quantities have been estimated, and work is limited to the areas and details depicted in the approved construction plans. No additional design work is needed.
1	Can we provide a bid for the design work, construction of ADA Ramp oversight and as-built plans for the ADA Curb Ramps ONLY?	This is a construction bid package and, as such, no additional design work is needed. Work limits have been determined, construction items and quantities have been estimated, and work is limited to the areas and details depicted in the approved construction plans.
