QUESTIONS AND ANSWERS
T202500901
SR 1 MEDIAN BARRIER, SR 30 TO SR 16
Thursday, June 18, 2026

Q #	Question	Answer
2	The bid date for the referenced project falls right after a major holiday weekend. As such, many vendors and sub contractors will be working with short staffs in the week prior and after as this is prime summertime vacation time. Given this, we respectfully request a one week extension of the bid date.	The bid date will be extended one (1) week via an addendum. The new bid due date will be July 14, 2026 by 2:00 pm.

Thursday, June 11, 2026

1	Would the Department consider allowing MASH TL-3 Length of Need high tension cable barrier for this project as the maximum slope is 6:1? Other states allow MASH TL-3 on slopes up to 6:1 per the current Roadside Design Guide (AR, AZ, CA, CO, MS, MT, ND, NM, NV, OR, SD, TN, UT and WV). In doing so, the Department would get competitive material pricing.	The MASH TL-4 requirement will remain as noted in the standard specifications.
